

UV radiation is a form of electromagnetic radiation that is invisible to the human eye. It is divided into three main types: UVA, UVB, and UVC. UVA is the most common type of UV radiation and is responsible for skin aging and tanning. UVB is responsible for sunburn and is a major cause of skin cancer. UVC is the most dangerous type of UV radiation but is mostly absorbed by the Earth's atmosphere. UV radiation is emitted by the sun and artificial sources such as tanning beds. It is important to protect your skin from UV radiation by wearing sunscreen, wearing protective clothing, and avoiding prolonged exposure to the sun.

UV radiation is a form of electromagnetic radiation that is invisible to the human eye. It is divided into three main types: UVA, UVB, and UVC. UVA is the most common type of UV radiation and is responsible for skin aging and tanning. UVB is responsible for sunburn and is a major cause of skin cancer. UVC is the most dangerous type of UV radiation but is mostly absorbed by the Earth's atmosphere. UV radiation is emitted by the sun and artificial sources such as tanning beds. It is important to protect your skin from UV radiation by wearing sunscreen, wearing protective clothing, and avoiding prolonged exposure to the sun.

1. UV - A is the most common type of UV radiation and is responsible for skin aging and tanning. UVB is responsible for sunburn and is a major cause of skin cancer. UVC is the most dangerous type of UV radiation but is mostly absorbed by the Earth's atmosphere. UV radiation is emitted by the sun and artificial sources such as tanning beds. It is important to protect your skin from UV radiation by wearing sunscreen, wearing protective clothing, and avoiding prolonged exposure to the sun.

2. UV - B is responsible for sunburn and is a major cause of skin cancer. UVC is the most dangerous type of UV radiation but is mostly absorbed by the Earth's atmosphere. UV radiation is emitted by the sun and artificial sources such as tanning beds. It is important to protect your skin from UV radiation by wearing sunscreen, wearing protective clothing, and avoiding prolonged exposure to the sun.
